

CONTRASPUM KWE

Antifoam agent

Chemical basis

Preparation of hydrocarbons and fatty acid derivatives

Characteristics

Appearance	white liquid
Solubility	emulsifiable in water
Density (20 °C)	approx. 0.88 g/cm ³
pH (10 %)	approx. 5
Residue of ignition	approx. 3 %

Shelf-life / Packaging

12 months if properly stored (+2 °C to 30 °C) | drums of 25 and 115 kg

Application

CONTRASPUM KWE is an excellent antifoam agent that prevents and destroys foam during the preparation of glaze and body slips.

It is used neat; the optimum addition depends on the foam density and stability and is generally below 0.1 %.

Note

Product tends to sedimentation. Please stir before use.
